

Request for Proposals #19-1902
Tulsa Transit
CNG Fuel Station Maintenance Amendment# 4
October 29, 2018

This amendment provides additional information to firms responding to RFP #19-1902 CNG Fuel Station Maintenance issued by Tulsa Transit .

Purpose: This amendment answers questions posed by proposers.

- 1) Would MTTA entertain an equipment lease for a 40 – 60 month equipment lease that would transfer to full ownership at the end of that term? The remainder of the 10 year contract would be full maintenance.

Yes.

- 2) Should we submit a proposal that includes replacing the current compressors would there be any future in keeping the old compressors as backup equipment?

We would entertain an option to keep the existing equipment as backup if there was a financial or operational advantage for MTTA.
